National Centre of Public Health and Analyses (NCPHA)	Bulgarian food composition database consists of 828 food products with13 main food groups.Each product is analyzed for 37 components as foods + components are given in the original BG language and with their english names.Most of them are analyzed in laboratory"Food chemistry", later recalled "Food chemical composition" during the last 10-15 years. Some foods are borrowed from the other references source, because of scientific interest. We intend to refresh permanently the BG database with new interesting foods.	Bulgarian National Centre of Public Health and Analyses, Bulgarian food composition database, https://ncpha.government.bg
Национален център по обществено здраве и анализи (НЦОЗА)	Българската база данни за състав на храните се състои от 828 хранителни продукта с 13 основни групи храни. Всеки продукт е анализиран за 37 компонента, като храните + компонентите са дадени на оригиналния български език и с техните английски имена. Повечето от тях се анализирани в лаборатория "Химия на храните", по-късно преименувана в "Химичен състав на храните" през последните 10-15 години. Някои храни са заимствани от други референтни източници, поради научен интерес. Възнамеряваме постоянно да обновяваме БГ базата данни с нови интересни храни.	Национален център по обществено здраве и анализи, Българска база данни за състав на храни, https://ncpha.government.bg
